

PNEUMATIC LIFT PLATFORM

The pneumatic platform is used for vertical transportation of workers at a height of 1.25m to 2.5m, depending on the carrier actuator used, the lifting speed is 6m/min. The load-bearing actuators are customized according to the customer's needs. The platform is driven by pneumatic actuators, it is powered by compressed air with a pressure of 6 MPa.

TECHNICAL SPECIFICATION

POWER SUPPLY: compressed air

PRESSURE: 6 bar

SIZE: 1180 x 1220 x 2850 mm

WEIGHT: 220 kg
